

2024 Outlook Presentation: Enterprise IT Spending Forecast for Healthcare and Life Sciences

Published 4 December 2023 - ID G00804806 - 2 min read

Gregor Petri

Initiatives: [Industry Markets and Technologies](#)

This research gives technology and service providers serving the healthcare and life sciences markets a graphical outlook of the IT spend forecast for 2024 and beyond, based on the latest Gartner vertical industry forecast data. TSPs can use it to aid planning and strategy activities.

Overview

This PowerPoint presentation gives technology and service providers (TSPs) serving the healthcare and life sciences markets a graphical outlook of the [Forecast: Enterprise IT Spending for the Healthcare and Life Sciences Markets, Worldwide, 2021-2027, 3Q23 Update](#). The presentation can be used to support planning and strategy activities.

The first section of the presentation deck presents multiyear total overviews of forecast IT spend categories for healthcare and life sciences. The second part includes bubble charts to present the forecast IT spend in 2024. It also includes the forecast compound annual growth rate (CAGR), the expected share of the growth per segment, and each bubble on the charts notes the 2024 IT spend and year-over-year (YoY) growth. The last two sections show IT spend breakdowns by subvertical and region.

For a discussion of the forecast data and the changes implemented since the previous update, see the overview section of the above-mentioned source document.
